

VOLUTIONFS PEARLED AND BANISHED

After a swift court case, VolutionFs has been sentenced to 2 months of imprisonment in a pearl, banishment from the Imperial Federation and more than 3000 diamonds in reparations.

On 25/11/2024 the Imperial Government pearled at the time Karydian president VolutionFs and minister of Arcane Arts RedSnapper. This spurred great outrage in the Imperial discord server, from citizens who demanded to know what the individuals were charged with. Urzork, Federal Judge, then opened 4 court cases, against Kalouie, Fatbeatle, RedSnapper and VolutionFs, all IF citizens residing in the Karydian Union.

They were charged with various crimes, including terrorism and treason. However, after swift proceedings, charges against Fatbeatle, RedSnapper and Kalouie were dropped. VolutionFs pleaded no contest to all charges, and was sentenced the following day. He was found guilty on 2 counts of criminal conspiracy, 1 count of aiding and abetting, 1 count of treason, 1 count of espionage and 1 count of terrorism.

In fact evidence surfaced proving that VolutionFs had plans to send sleeper agents in Pavia, that he wanted to wage a war against the latter and Icenia, and that he had aided others in raids.

THE FOREIGN REGISTRATION ACT

The Karydian government enacted the Foreign Registration Act on Sunday Nov. 17, with officials citing a need to ensure national security as the law's justification.

The law clarifies the official political status of Karydian citizens, and limits who may and may not hold political office in the nation. The Foreign Registration Act was introduced to the Karydian congress by Minister of Internal Security Red___Medic (RedxMedic on Discord) on Sunday, and was passed unanimously by members of congress later that day. The new legislation limits who may qualify as an official Karydian citizen to players who claim "primary citizenship" in the Karydian Union. "Players must be claiming primary citizenship in the KU to qualify as a citizen," the law reads. Further, the law limits who may hold Karydian government positions to citizens who don't hold government positions in other nations or states. "Players are not authorized to be Citizens if they hold any governmental positions in other nations or states," the law reads.

"Guests [non-Karydian citizens] are not allowed to hold office in any official capacity within the KU."

Red___Medic said that he had introduced the law due to concerns about national security. "The intent of the bills was to increase our state security against insider threats," Red___Medic said.

"Reforming our citizenship policy helps keep our government secure from outside influences who do not have our best outcomes in mind."

VolutionFs, the (former) president of the Karydian Union, said that the law was also enacted due to former Karydian citizen and congressman Monsta, who had sought to retain his seat in the Karydian congress but leave the state.

"Monsta wanted to keep his government position even though he was leaving our state," VolutionFs said.

"I already strongly dislike people who hold more than one citizenship, and wouldn't let them be a voting citizen, let alone hold a government position."

Monsta declined to comment.

A NEW STATE IN DELUVIA

New Haven is the latest addition to the Imperial Federation. Formed by former Karydian citizens unhappy with VolutionFs's presidency (who was later sentenced to 2 months of pearling for various high crimes), it comprises of the former territory of the states of Gotia and Wehtun. A region in northern Gotia has been put under Plupsnup's autonomous governance for sheep farming, the founders of the new state claim to have plans to found a new city spanning most of the island of Gotia.
